# Safetree™ Safety Cards

**Safetree's message is to do each job the right way, the safe way, every single time, no matter what.**

As part of our commitment to forest industry safety, we must ensure all safety hazards are identified and managed.

Each of the following cards identifies a safety hazard and explains how to deal with it.

The cards are a great tool to help with continued education, safety reminders and inducting new employees, subcontractors and authorised site visitors. Please ensure they are readily available for everyone.

For more copies of these cards, or to find out how **Safetree™** can help keep your site and staff safe, please contact us on **(04) 473 4769** and visit **[www.safetree.nz](http://www.safetree.nz)**.
