

**IF YOU CAN LEAD  
PEOPLE IN SAFETY:  
YOU CAN LEAD  
ANYWHERE.**

# *Safetree leadership training*

## **WHY TEACH LEADERSHIP SKILLS?**

We put processes in place to keep people safe, but without leaders who *influence* their teams, our processes remain just good ideas on paper.

It's not that people don't want to be safe, or don't want to be healthy – we all do! Most of us just need someone to help us focus on the right things – and that requires leadership skills.

## **BENEFITS OF THIS TRAINING**

We know 'safety lectures' don't work.  
We know that telling adults what to think probably won't work!

So, our leadership challenge is to get people to agree on what we want to achieve, and commit to doing it a certain way.

On this 2-day course we will practice the skills of influencing individuals and teams to make good, safe decisions, and achieve top results.

## **WHAT WILL MY STAFF LEARN?**

### **How to:**

- Lead a high-performance team that focuses on key results including health and safety
- Effectively communicate to people who are different from you
- Get workers involved in solving problems and making good health and safety decisions in the bush
- Hold people accountable without bullying
- Focus teams on learning from when things going right...not just waiting for things to go wrong.

## **DATES AND REGISTRATION**

- **1-2 February: Gisborne. Venue, Cosmopolitan Club**
- **1-2 March: Whangarei. Venue, Cheviot Park Motor Inn**
