GROWING OUR SAFETY CULTURE

WORK PRESSURE
When work changes we stop, and rethink. We talk and make a new plan.

RISK MANAGEMENT
Critical risks are identified and controlled. Controls are reviewed and discussed regularly.

LEARNING
Near misses and incidents are always used as a chance to learn and improve.

RESOURCES
The work has been planned and enough time, people and gear allowed to do the job safely and well.

RECOGNITION
Safe work practices and behaviours are recognised and rewarded on our site.

TRAINING AND COMPETENCY
All people on our site have the job and safety skills to do their job safely and well.

RELATIONSHIPS
There is trust and openness between management and crew, and amongst the crew itself on our site.

REPORTING AND INVESTIGATING
All hazards, near misses and incidents are reported on our site.

WORKER ENGAGEMENT
Workers are invited and encouraged to contribute to safety decisions.

COMMUNICATION
Information is shared. Workers get actively involved in safety discussions.

LEADERSHIP
People discuss safety, listen to each other and follow through on the commitments they make to deal with safety issues. People step in, stop work or speak up if they see unsafe conditions.

SYSTEMS AND PROCEDURES
Our safety instructions and procedures are simple and clear. They are understood by our people.
