

Safetree Conference: Partnering for Change 13 & 14 March, 2019

FISC and FICA are proud to partner to get our foresters home safe each night.

It is becoming more and more obvious that achieving this will require not just best practices, but also good management of the health and wellbeing of our people, the work environment and the external pressures to achieve productivity for their employers. The conference will bring together key speakers with solutions and tools to address these challenges that are faced every day. There will be an opportunity for delegates to check out products and equipment at the Trade Display area both on the 13 & 14 March. We will get together on the first night, Wednesday 13 March, to network before the conference at a Welcome Dinner with dinner speaker before we head into the conference and guest speakers the next day.
