

EcoPortal is LIVE

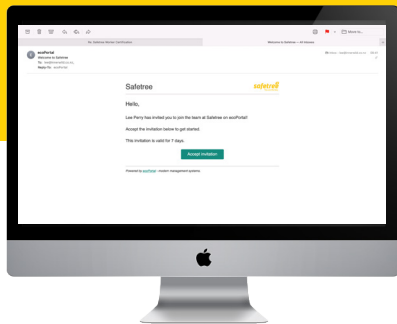

As of 17 January 2022, the Safetree Certification system has moved from BraveGen to EcoPortal. With EcoPortal, you can see all of your audit information! Plus, you can share it with Forest Managers or others as you like.

Follow these easy instructions to complete your registration with EcoPortal:

Look in your inbox for a registration email from EcoPortal.

If you can't see it, check your SPAM folder.

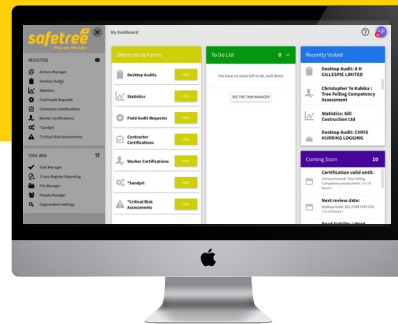

1

Once registered, you'll need to complete your Desktop Audit.

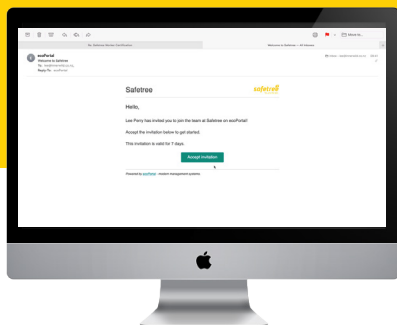

We need this information for field audits to be allocated to auditors.

3

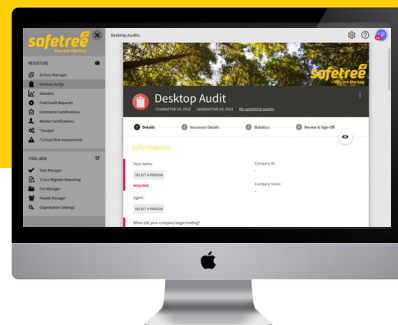

2

Click Accept Invitation in the email to register and follow the prompts

4

Make sure you have copies of your insurance certificates to upload.

What's next?

Already certified? Great! There's nothing else you need to do until you're due for your next field audit (every two years)

Not yet certified? You'll need to complete a "Field Audit Request" as well
